Disclaimer

The Audit Team has prepared this report for the **Sindhi Seva Samiti's Sindhi Institute of Management** located at No. 33/2B, Kempapura, Hebbal Bangalore – 560024, Karnataka, India based on input data submitted by the Institute analysed by the team to the best of their abilities.

The details have been consolidated and thoroughly studied as per the various guidelines for Green Buildings available in National and International Standards; the report has been generated based on comparative analysis of the existing facilities and the prerequisites formulated by various standards. The inputs derived are a result of the inspection and research. These will further enhance and develop a Healthy and Sustainable Institution.

These can be implemented phase wise or as a whole depending on the decision taken by the Hon'ble Management and College. The warranty or undertaking, expressed or implied is made and no responsibility is accepted by Audit Team in this report or for any direct or consequential loss arising from any use of the information, statements or forecasts in the report.

The audit is a thorough study based on the inspection and investigation of data collected over a period of time and should not be used for any legal action. This is the property of Greenvio Solutions and should not be copied or regenerated in any form.

About the Institute

Sindhi Institute of Management started in 2014 is a leading provider of globally recognized, Industry relevant Masters of Business Administration program. It works closely with corporate partners to ensure its programs are specifically tailored to reflect global market trends, and to offer complete flexibility for the students as they work towards success in a way that is suited to their career ambitions, and compatible with their personal commitments.

About the Energy audit

The following documentation is based on the consumption practice of the premises on a regular working day.

Figure 1: Summary of the calculated electrical consumption as per inventory

The above graph shows that equipment consumes 48% whereas the air conditioners consume 43% while the lights consume 6% and the fans consume 3% of the total calculated electrical energy.
